

DATA ANALYST

ABOUT ME

- Aspiring AI/Data Science enthusiast with strong foundation in Python, SQL, Machine Learning, and Data Analytics.
- Hands-on experience in academic and personal projects involving data analysis, visualization, and predictive modeling.
- Familiar with Python libraries such as Pandas, NumPy, Matplotlib, and Scikit-learn for data processing and machine learning tasks.
- Basic understanding of Artificial Intelligence, Deep Learning, ETL concepts, and cloud technologies like AWS and Azure.
- Experience creating dashboards and reports using Power BI and Excel for data-driven insights.
- Strong analytical thinking, problem-solving abilities, and passion for learning emerging AI technologies.
- Quick learner with good communication and teamwork skills.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Python Libraries: Pandas, NumPy, Matplotlib, Scikit-learn

AI/ML Concepts: Machine Learning Basics, Data Preprocessing, Model Evaluation

Visualization Tools: Power BI, Tableau, Excel

Databases: MySQL, PostgreSQL

Cloud Technologies: AWS (Basics), Azure (Basics)

Development Tools: Git, GitHub, Jupyter Notebook, GoogleColab, VS Code

Concepts: Data Analysis, Data Cleaning, ETL Basics, Exploratory Data Analysis (EDA)

EDUCATION

2022-2026	Bachelor Of Technology
------------------	-------------------------------

BIET	Data Science	71.5
------	--------------	------

2020-2022	Telangana State Board of Intermediate Education
------------------	--

Master Minds	MPC	87.4
--------------	-----	------

2019-2020

Secondary School Certificate

Sri Triveni School

10th

9.3

ACADEMIC PROJECTS

Bharat Institute Of Engineering And Technology

June 2025-May 2026

Vision Guard – AI-Based Eye Defect Detection and Sight Correction

AI/ML Developer

Responsibilities:

- Developed an AI-powered web application for eye disease detection and vision assistance using Computer Vision and Deep Learning techniques.
- Implemented CNN-based disease prediction models to identify eye conditions such as cataract, glaucoma, diabetic retinopathy, and conjunctivitis.
- Built image preprocessing and classification pipelines using OpenCV, TensorFlow, and Python.
- Integrated RAG (Retrieval-Augmented Generation) based chatbot functionality for intelligent PDF medical report analysis and question-answering.
- Developed backend APIs using Flask for image upload, disease prediction, and report generation workflows.
- Implemented text extraction and an NLP-based querying system for uploaded medical PDF reports.
- Designed automated PDF report generation with diagnosis summaries, confidence scores, and medical recommendations.
- Utilized transfer learning techniques with pretrained deep learning models for improving prediction accuracy.
- Developed responsive frontend interfaces using HTML, CSS, and Flask templates for user interaction and accessibility.
- Integrated assistive AI features such as text-to-speech guidance and object detection support for visually impaired users.
- Performed model testing, debugging, validation, and performance analysis using multiple eye image datasets.

Environment: Python, TensorFlow, OpenCV, Flask, CNN, RAG, NLP, Scikit-learn, NumPy, Pandas, HTML, CSS, Jupyter Notebook, GitHub

TECHNICAL PROJECT EXPERIENCE

CodSoft – Data Science Intern

Apr 2025-May 2025

Projects:

- Developed a **Titanic Survival Prediction** model using Machine Learning algorithms and data preprocessing techniques.
- Built a **Movie Rating Prediction** system using regression models and exploratory data analysis.
- Developed a **Sales Prediction** model using Python and machine learning techniques for forecasting business sales trends.
- Utilized Python libraries such as Pandas, NumPy, Matplotlib, and Scikit-learn for model development and visualization.
- Performed data cleaning, feature engineering, model training, and evaluation for predictive analytics tasks.

Environment: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Google Colab

Oasis Infobyte – Data Analytics Intern

Oct 2025-Nov 2025

Projects:

- Developed a **Sentiment Analysis** project for analyzing and classifying customer opinions from textual data.
- Built a **Fraud Detection** system using Machine Learning techniques for identifying suspicious transactions and anomalies.
- Performed **Exploratory Data Analysis (EDA)** on retail sales datasets to identify trends, patterns, and business insights.
- Worked on **data cleaning and preprocessing** techniques including handling missing values, duplicate records, and data transformation.
- Developed an **Autocomplete and Autocorrect system** using Python-based text processing and predictive analytics concepts.
- Utilized Python libraries such as Pandas, NumPy, Matplotlib, and Scikit-learn for data analysis, visualization, and model development.
- Performed data preprocessing, model evaluation, and visualization workflows for analytics and predictive modeling tasks.

Environment: Python, Pandas, NumPy, Matplotlib, Scikit-learn, Google Colab, GitHub

Projects:

- Developed a **Quikr Price Prediction** system using Machine Learning techniques for predictive analytics and price estimation.
- Built a **Diabetes Prediction** model using classification algorithms for healthcare-based predictive analysis.
- Developed a **Breast Cancer Detection** system using Machine Learning techniques for medical diagnosis and classification tasks.
- Performed data preprocessing, feature engineering, model training, and evaluation for predictive analytics workflows.
- Utilized Python libraries such as Pandas, NumPy, Matplotlib, and Scikit-learn for data analysis, visualization, and model development.
- Applied Machine Learning concepts including regression, classification, and model evaluation techniques on healthcare and business datasets.

Environment: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Google Colab, GitHub

SOFT SKILLS

- | | | |
|--------------|-----------------|-------------------|
| ● Leadership | ● Teamwork | ● Problem Solving |
| ● Analytics | ● Communication | ● Innovation |

CERTIFICATIONS

- Certificate of completion of R program.
- Certificate of Completion of SQL PROJECTS.
- Certificate of Excellence in project building.
- Certificate of participation in Innomatics research lab
- Certificate of completion in skill nation for Artificial Intelligence workshop.
- Certificate of completion conducted by be10x on chat gpt and AI tools workshop.
